 FAQ

I don't know who is paying the money for advertisement. If you have read a big ebook in ePub, it takes a long time for you to read that ebook because ads keep coming to you. If you don't want to use it, don't use it. This ePub is pay per ebook only, I don't see any ads. Anybody else? Embed the ad is so disturbing for me. For some reason my computer doesn't respond to the ad, it

keeps asking me every few minutes, to click to see what is that ad. I click yes just to close the dialog box but some time it doesn't go away. Other than that it is a good reader. Edit: After downloading it twice it started working Hi, I just downloaded the 32-bit version of Reader X (9.6.2.140) from your web site. It is working fine for me. I did use the embedded ad so I am not sure what your problem is. You may want to take a look at the Adobe documentation for Reader and see what the best (free) method is to get rid of the ad: I don't know if there are other e-book reader applications (such as Calibre) that have a better method for dealing with the ads. I was curious, so I downloaded the new version (9.6.3.1051). I really liked the old version, but there are so many little things that I like about the new version. The first one is that the reader no longer is free (I think Adobe probably is testing the waters with this to see what the revenue model will be like, or something like that). There are "Save As" options now to allow you to save the books that you want in a new location. I like this, because then you don't have to save the books that you want to read to the same directory as you have the old version. Also, the new version allows you to add a "My Books" page with all of your saved books. One other thing that I found nice about the new version 82157476af
